HIGHLIGHTS OF QUALIFICATIONS

- Experience in front-end and full-stack web development using JavaScript, HTML, CSS, React, Node.js, Express.js, MongoDB, and RESTful APIs to build responsive, interactive web applications
- Ability to use UX/UI design principles to evaluate, redesign, and develop user-centered digital experiences, including responsive websites, branding strategies, and interactive media projects
- Demonstrated leadership and collaborative teamwork skills through successful partnerships with multidisciplinary teams to deliver complex technical and interactive media projects
- Hands-on experience integrating modern development tools and workflows, including Git, GitHub, Playwright, and agile project collaboration to support efficient, high-quality software development

COMPUTING AND INTERACTIVE TECHNOLOGY FOCUSED EDUCATION AND AWARDS

Rochester Institute of Technology, Golisano College of Computing and Information Sciences

Rochester, NY

Bachelor of Science, New Media Interactive Development

August 2022- May 2026

Minor in Communication

Honors Program, Dean's List every semester, Awarded Outstanding Undergraduate Scholar

Courses in computing including web development, UX/UI design, programming, physical computation, and introductory design coursework

TECHNICAL SKILLS

Programming | JavaScript, HTML, CSS, Kotlin

Frameworks | React, Node.js, Express.js, Handlebars.js, p5.js, PixiJS, howler.js, A-Frame, AR.js, MongoDB, Mongoose, Redis

Tools and Software | Git, GitHub, npm, Heroku, Android Studio, Arduino IDE, Playwright, Axure, Adobe Illustrator & Photoshop, Twine

WEB AND DIGITAL MEDIA DEVELOPMENT EXPERIENCE

[Platinum Car Wash](#)

North Tonawanda, NY

Digital Marketing & Web Development Intern

June 2026 - August 2026

- Conducted a comprehensive audit of the Platinum Carwash website, evaluating design, usability, responsiveness, user experience, SEO effectiveness, Google Business Profile optimization, and performance insights using Google Analytics and Google Search Console
- Designed and developed a modern, mobile-responsive website aligned with company branding using VS Code, HTML, CSS, and JavaScript
- Evaluated the company's social media presence across platforms including Instagram and Facebook, identifying opportunities to improve branding, content consistency, and audience engagement
- Developed a cohesive brand strategy by establishing a unified visual identity, brand voice, and content approach

DIGITAL DEVELOPMENT AND INTERACTIVE MEDIA PROJECT EXPERIENCE

[Floss Boss](#) | Project Manager and Lead Developer, Capstone Project

- Selected as a finalist for alt.ctrl.GDC 2026, developing an underwater-themed dental game featuring custom brushing and flossing mechanics controlled through original hardware interfaces
- Led a multidisciplinary team of 9 developers as Project Manager, coordinating sprint planning, project timelines, team communication, and faculty stakeholder updates to keep development on schedule
- Engineered custom Arduino-based brushing and flossing controllers using light sensors and capacitive touch sensing to create intuitive, physical gameplay interactions
- Developed the hardware-to-software communication pipeline by processing real-time sensor input and transmitting data to the game frontend for responsive gameplay integration
- Designed and implemented calibration dashboards to configure brushing and flossing sensitivity thresholds, improving controller accuracy, reliability, and overall player experience

[Watchlist Maker](#) | Rich Media Web App Dev II

- Developed a full-stack watchlist application using React, Node.js, Express.js, MongoDB, Redis, and Handlebars, implementing scalable backend architecture and dynamic data handling
- Designed and implemented automated end-to-end testing with Playwright, integrating test execution into GitHub workflows to improve code quality and streamline the development process
- Built and implemented RESTful API endpoints (GET, POST, DELETE, HEAD) to support creating, retrieving, and removing watchlist items while enabling efficient client-server communication

[Sonic Hangman](#) | Rich Media Web App Dev I

- Developed a Sonic-themed Hangman game using HTML, CSS, and TypeScript, implementing interactive gameplay mechanics and responsive user interface components
- Designed and implemented custom CSS animations, hover effects, and scrolling background to create an engaging and dynamic experience
- Integrated audio functionality using howler.js, incorporating background music and interactive sound effects to enhance gameplay
